

Prodec Acoustic Booth

A soundproof, private room that moves with you — dropped into any open office, no construction.

30 dB

sound insulation

1–6

people per cabin

2 h

to assemble

100%

movable

The Prodec Acoustic Booth is a soundproof, private space you can **move and take apart**. It is used in offices, instrument training, education, live broadcasting and more.

The shell is built like a high-speed-rail carriage: a frame of **aerospace-grade aluminum profiles**, aluminum honeycomb panels and tempered glass. Every aluminum part is fireproof, odorless and stable; walls and ceiling are lined with acoustic PET, the floor with nylon carpet.

WHAT'S INSIDE

Engineered to be quiet

Sound insulation 30 dB (±5 dB) · 0.25 s reverb

A 38 mm double-layer aluminum honeycomb panel, faced with high-density damping felt and lined with acoustic materials — quiet gets in, noise stays out.

Fresh air in 2 minutes Low-noise ventilation

A multi-layer sound barrier wraps the ventilation tunnel, cutting fan noise while fully refreshing the air inside every two minutes — it never gets stuffy.

LED lighting 150 LX · 4000 K

A 4000 K ceiling lamp covers everyday use; scene lighting is customizable and a backup power supply can be fitted inside the booth.

Power & USB 100–240 V · 12 V-USB

Rated 100–240 V / 50–60 Hz with a 12 V-USB socket and a volume-adjustable fan dial. Two switches run the light and the exhaust fan separately; 1.5 m cord, up to 3 m.

Low-noise fan

Silent door lock

3C tempered glass

Nylon carpet floor

FINISHES

Eight colors to choose

Four finishes on every series — Raw White, Grass Green, Wood Grain and Dark Grey; the PC series adds four more. Desktops come in wood grain or white.

Raw White

Grass Green

Wood Grain

Dark Grey

Bright Blue

Silver

Lemon Yellow

Deep Orange

MODULAR

Assembled in two hours

The booth ships flat as panels and profiles and clicks together on site — a full build in as little as two hours. It moves with your team and takes apart just as fast.

Bring quiet to your floor

Tell us how many people need it and what for — calls, meetings, recording or focus — and we'll size the cabin for you.
